A SIGNATURE DUPLEX PENTHOUSE ABOVE THE MEDITERRANEAN IN HIGUERÓN Some homes are defined by their location. Others by their architecture. This exceptional four-bedroom duplex penthouse brings together both, adding panoramic views, remarkable outdoor space and a level of personalised luxury rarely found in the area. Offering approximately 312 m² of internal and exterior space, the residence combines the proportions of a private villa with the privacy, security and convenience of penthouse living. A HOME DESIGNED AROUND EFFORTLESS LIVING Despite being a duplex penthouse, all four bedrooms, four bathrooms and the principal living spaces are arranged on one level. This creates an exceptionally comfortable and practical home, with no need to move between floors during everyday life. The bright open-plan living, dining and kitchen area connects naturally with the main terrace. Large windows bring the Mediterranean landscape into the interior, while a beautifully integrated fireplace introduces warmth and intimacy. The property is offered luxuriously furnished, allowing the new owner to enjoy it from the moment they arrive. A PRIVATE ROOFTOP CREATED FOR LIFE OUTDOORS The upper level is dedicated entirely to a spectacular private rooftop terrace of over 100m². Completed to the highest standards, it has been transformed into a sophisticated outdoor living environment with a fully equipped summer kitchen, an elegant gazebo and a private Jacuzzi. This is a space designed for every moment of the day: relaxed breakfasts in the morning sun, long

lunches overlooking the Mediterranean, quiet afternoons beside the Jacuzzi and sunset dinners with the mountains in the distance. Its elevated position provides panoramic views across the sea and surrounding landscape, capturing both sunrise and sunset. INTELLIGENT COMFORT, WHEREVER YOU ARE The penthouse has received numerous upgrades and is being equipped with the latest home-automation technology. Lighting, air conditioning and heating can be controlled remotely, making it possible to prepare the atmosphere and temperature of the home before arriving. The technology is designed to remain discreet and intuitive, enhancing everyday comfort without interrupting the clean interior aesthetic.
